

Solaja Emmanuel

Junior Front End Developer

Highly motivated Junior Front End Developer with a passion for creating responsive and user-friendly web applications. Proficient in HTML, CSS, and JavaScript, with a strong understanding of modern front-end frameworks like React (or Vue/Angular, if applicable). Experienced in building reusable components to improve maintainability and optimize application performance. Eager to contribute to a dynamic team and further develop my skills in a fast-paced environment.

Work Experience

Kemtobs Communication March 2024 - September 2024

Intern, Front-End Developer

- Developed and implemented interactive website features, including conditional logic, data filters, and dynamic pricing models, enhancing user engagement and functionality.
- Engineered responsive web designs using modern CSS techniques and media queries, ensuring seamless cross-device compatibility and optimal user experience.
- Constructed reusable front-end components with React (or relevant framework, if applicable), promoting code maintainability and scalability for future development.
- Optimized website performance by implementing efficient code practices and minimizing load times, resulting in a measurable improvement in page speed.

Education

Redeemer's University September 2018 - July 2023

Bachelor Of Arts, History and International Relations

Projects

Power Sets | Personal Project (Nov 2024)

[Website](#)

- Developed and deployed a dynamic, multi-page web application featuring 3+ interactive and responsive UI screens using ReactJS.
- Implemented responsive design principles with Tailwind CSS, ensuring optimal user experience across various devices and screen sizes.
- Optimized website performance, resulting in reduced page load times and improved overall user experience.
- Utilized ReactJS components to create reusable UI elements, enhancing code maintainability and scalability.

River Store | Personal Project (Nov 2024)

[Website](#)

- Developed a fully functional e-commerce web application using ReactJS, featuring intuitive navigation and comprehensive product categorization.
- Designed and implemented a clean, modern user interface with React Bootstrap, ensuring a seamless and engaging shopping experience.
- Implemented key e-commerce functionalities, including product display, category filtering, and user-friendly navigation.
- Leveraged ReactJS components to create reusable UI elements, improving code maintainability and scalability.

Homes | Personal Project (Dec 2024)

[Website](#)

- Developed a contemporary real estate web application using ReactJS, incorporating advanced search and filtering functionalities for property listings.
- Designed and implemented an intuitive and visually appealing user interface with React Bootstrap, facilitating seamless navigation and property exploration.
- Implemented key features such as property details display, interactive map integration, and user-friendly search filters.
- Leveraged ReactJS components to create reusable UI elements, ensuring clean, maintainable, and scalable code.
